

PAICRISTAL
MASTER IN POLISHING

Premium polishing compounds

Polishing solutions for car care and detailing

Our goal is to provide clear, tangible, and easy solutions for both professionals and car enthusiasts. PaiCar automotive line was developed to offer effective and convenient polishing products and processes for car care and detailing.

PaiCar is a product line of Pai Cristal Italia, a multinational company that has been developing and producing specific polishing processes for high-level surface treatment, including within the renowned Italian high-end markets, since its inception in 1965.

paicar.paicristal.com

Industrial solutions for stainless steel, aluminum, brass, plastics and paints.

Building on its many years of experience and expertise acquired in the eyewear and jewellery sectors, Pai Cristal Italia has broadened its offerings by providing solutions to the wider field of industrial manufacturing.

The goal is servicing key players of the production chain by developing and producing specific polishing pastes and the fastest polishing systems.

01

It removes marks, failings, dullness and P1200-P2000 sand scratches, as well as restores badly oxidized paints. It may be used both on old and on new well dried paints.

11 SOLID BARS DISCOVER THE RANGE

Providing the market with efficient products that make you save polishing time, quickly reaching the wished excellent surface finish: this is our mission.

To this end, Pai Cristal Italia offers a complete range of solid bars, designed to work on different materials (stainless steel, paint, plastics, brass, aluminum, etc.) and suitable for all industrial areas (automotive, furniture, sanitary, musical instruments, eyewear, jewelry and many more). For ease of identification, the products have been divided into 4 color-coded ranges. RED (range 100) includes the most abrasive products; ORANGE (range 200) medium-abrasive pastes; BLUE (range 300) includes finishing pastes, while GREEN (range 400) consists of solid bars for super finishing action.
